

WHY ARE WE HERE?

In January, Staton Cohen Landscape Architects, on behalf of the London Borough of Tower Hamlets started a public consultation process about improvements to Heylyn Square.

We have begun by asking what you like about the square and what things you like to change. From this information we have produced these designs to present to you today.

WHO WE ARE:

STATON COHEN Landscape Architects, have been appointed by The London Borough of Tower Hamlets to develop designs for a community based project to improve the quality of Heylyn Square.

WHAT IS BEING PROPOSED:

We have produced two designs:

1. Retaining the openness of the square but improving the facilities.
2. Redesigning the square with a hedge to enclose it more and a new community space.

We would like your opinion on the designs and on the facilities that could be included in the square.
